Celebrating Onam 2026, the Sealine Way

SEALINE ONAM 2026

A Feast of Tradition,
Togetherness & Kerala's
Flavours

Sealine Shipping & Removals proudly celebrated the spirit of Onam 2026 with a joyful gathering filled with tradition, delicious food, and cherished moments of togetherness.

The celebration took place at Taste of India Restaurant, RAVIZ Centre Point Hotel, Bur Dubai, Mankhool, bringing the Sealine team together to enjoy a memorable Onam Sadhya and celebrate the rich cultural heritage of Kerala. From the vibrant festive atmosphere to the authentic flavours of the feast, the occasion was a wonderful reminder that wherever we are, traditions have the power to bring people closer.

Heavy Equipment, Securely Lashed

Professional Lashing & Securing of Excavators for Safe Transport

Excavators were securely lashed in a 1 × 40' Flat Rack (FR) container

Sealine Shipping & Removals provides professional lashing and securing solutions for heavy equipment, ensuring cargo remains stable and protected throughout transportation. For this shipment, excavators were securely lashed in a 1 × 40' Flat Rack (FR) container.

Our team used a combination of high-strength lashing belts, chains, and wooden dunnage to secure the equipment effectively and minimise movement during transit. From positioning to final securing, every step was carefully carried out with safety and cargo protection in mind. Our experienced handling team ensures heavy and oversized machinery is prepared for reliable transportation, helping customers move valuable equipment with confidence.

LASHING BACK PROJECTION SCREEN

This back projection screen was carefully prepared for international transportation, with the equipment securely packed inside a heavy-duty wooden box to ensure maximum protection during handling and transit.

For added stability and safety, high-strength lashing belts were used to secure the packed screen and prevent movement during transportation. The shipment was loaded into a 40FR (40-foot Flat Rack) container, providing the required space and secure positioning for this oversized cargo. From professional packing and lashing to container loading, every step was handled with precision and care.

Sealine's specialized cargo handling solutions help protect valuable equipment throughout its journey—ensuring it reaches its destination securely and ready for use.

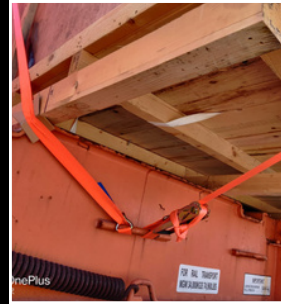

KEY FACTS

UAE's growing focus on logistics resilience & multimodal connectivity

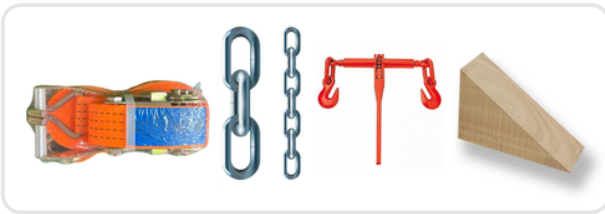

With disruptions around the Strait of Hormuz affecting regional trade, UAE logistics operators expanded alternative sea, road, rail and air routes. AD Ports Group increased its use of Fujairah and Khor Fakkan while adding trucks, rail services and air-cargo solutions. Meanwhile, Dubai Customs reported a 53% increase in air-cargo customs transactions during H1 2026, reaching 18.2 million transactions. Khorfakkan also launched a direct shipping route from China, reducing transit times for vehicle shipments. These developments reinforce the UAE's position as a flexible, technology-driven global logistics hub.
