LASHING AND SECURING COURSE

Sealine Shipping
Committed to Safety,
Training & Excellence

Sealine Shipping recently conducted a Lashing Awareness Class for its employees to reinforce safe cargo handling practices and industry best standards. The session focused on the importance of proper lashing techniques to prevent cargo movement, damage, and workplace accidents during transportation. Employees gained practical insights into different lashing methods, equipment usage, load distribution, and compliance with safety regulations. Real-life scenarios and demonstrations helped participants understand risk factors and preventive measures more effectively. The training aimed to enhance operational efficiency, promote a strong safety culture, and ensure the secure movement of cargo across all shipping operations.

HEAT SHRINK WRAPPING & LASHING OF SIMULATOR

The simulator, with a total weight of 10,000 kg, was carefully prepared to ensure maximum safety during transportation. The process began with heat shrink wrapping, providing complete protection against dust, moisture, and external environmental factors. Following this, cargo lashing was carried out to secure the load firmly and prevent any movement during transit. High-quality lashing belts and lashing chains were used, selected based on the weight and dimensions of the simulator. This combined packing and lashing approach ensured stability, load integrity, and compliance with safety standards throughout handling and transportation.

CHRISTMAS 2025

Christmas 2025 at Sealine Shipping was a joyful celebration of togetherness, gratitude, and team spirit. The workplace came alive with festive cheer as employees shared smiles, laughter, and warm wishes. It was a moment to reflect on achievements, strengthen bonds, and look ahead with positivity, unity, and renewed commitment for the year ahead.

UAE-NIGERIA PARTNERSHIP FUELS LOGISTICS BOOM IN JANUARY 2026

In January 2026, the UAE logistics sector is witnessing strong growth, driven by strategic investments, rapid technology adoption, and landmark international trade agreements. A major catalyst is the newly concluded economic partnership agreement between Nigeria and the United Arab Emirates, described by Nigerian President Bola Tinubu as a historic milestone. The pact strengthens cooperation across logistics, renewable energy, aviation, agriculture, digital trade, and climate-smart infrastructure, positioning the UAE as a key gateway for Nigerian businesses to global markets.

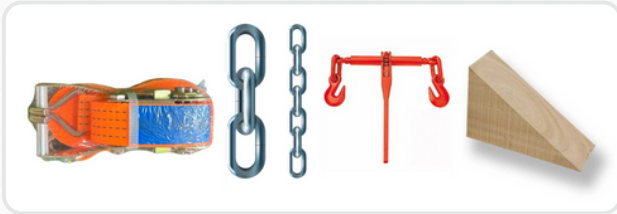

Nigeria's recent economic reforms have already delivered a 21% rise in non-oil exports and over \$50 billion in investment commitments, boosting confidence among global investors. The agreement may also lead to the resumption of Emirates Airline flights to Abuja, further easing trade and business travel. Alongside logistics expansion, Nigeria's strong focus on climate action, green finance, and renewable energy aligns closely with the UAE's sustainability vision, reinforcing the UAE's role as a central hub for future-ready, sustainable global trade.

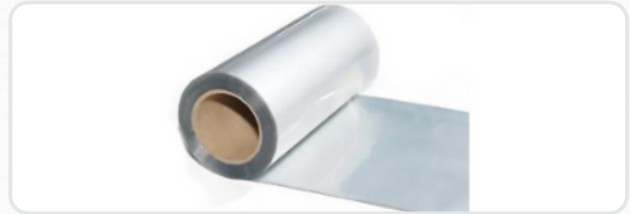

NEW YEAR 2026

New Year 2026 at Sealine Shipping was welcomed with optimism, unity, and renewed energy. The celebration reflected gratitude for past achievements and enthusiasm for new opportunities ahead. Team members came together to share hopes, strengthen collaboration, and reaffirm their commitment to safety, excellence, and growth. As the new year begins, Sealine Shipping moves forward with confidence, teamwork, and a strong vision for continued success in the logistics industry.
