Ready for Take-off: Airfreighting a BOP

Engineered packing and precision handling for critical Oil & Gas assets

A Blowout Preventer skidded, lashed and crated for expedited airfreight

When rig downtime costs tens of thousands of dollars a day, expedited airfreight for a Blowout Preventer (BOP) is a necessity. But moving a BOP at 30,000 feet is complex project cargo, not standard logistics. Our team engineered ISPM-15 certified heavy-duty skids with load-spreading beams to respect aircraft deck bearing limits, plus dampening mounts to absorb vibration through takeoff, turbulence and landing. The centre of gravity was mapped and marked, the skid matched to heavy-lift ULD pallets, and aviation-grade lashing rated for 1.5G to 3G restraint held it firm in flight. Specialist packing and handling guarantee compliance, safety and speed.

Have an upcoming heavy-lift or AOG requirement? Let’s engineer your next critical move.

HEAVY LIFT OPERATIONS IN DUBAI

No cargo is too oversized or overweight for Sealine.

Tandem crane offloading of power generation equipment at our Dubai open yard

Our team recently completed another successful offloading and open yard storage operation in Dubai, safely receiving and securing over 135 metric tons of critical power generation equipment.

When it comes to out-of-gauge (OOG), heavy-lift, and project cargo logistics, thorough planning and technical execution are everything.

From specialized heavy-offloading to secure open yard storage, Sealine provides end-to-end logistics solutions tailored for any oversized or overweight asset storage required in Dubai and across the UAE.

CARGO HANDLED & STORED

Cargo	Gross weight	Dimensions (L × W × H)
16.5 MW Gas Turbine Generator Package	64,586 kg	18.0 × 3.35 × 4.25 m
Generator Unit	35,950 kg	5.4 × 2.45 × 3.11 m
Electrical Equipment Module (EEM)	35,000 kg	16.0 × 2.90 × 3.50 m

UAE MAKES PRE-LOAD CARGO INFORMATION MANDATORY

1 October 2026 | Maritime Pre-Load Cargo Information (MPCI)

The UAE's Maritime Pre-Load Cargo Information (MPCI) programme became mandatory on 1 October 2026 for shipping companies and freight forwarders handling cargo destined for, transiting through, or transshipping via the UAE.

Under the programme, cargo information must be submitted before a vessel departs from its loading port. Authorities can accept the filing, request additional information, or issue a **Do Not Load** decision. Non-compliance may result in penalties or shipment delays.

At Sealine Shipping, we help our customers stay ahead of new regulations with accurate, timely documentation for every shipment.

WHY IT MATTERS

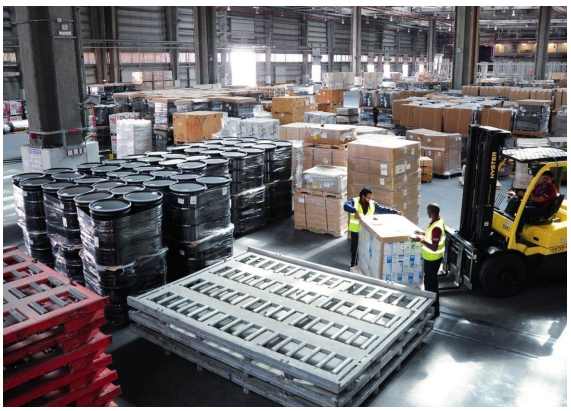

- **Freight forwarders** must ensure accurate and timely cargo documentation.
- **Shipping companies** need to build advance cargo filing into their operations.
- **Importers and exporters** should coordinate with logistics partners to minimise delays.

DUBAI AIR CARGO SURGES

Volumes jump 53% as e-commerce expands

Latest reported figures: 31 August 2026

WHY IT MATTERS

Freight forwarders and logistics providers can explore opportunities in e-commerce fulfilment, air freight, customs clearance, last-mile delivery and cross-border distribution.

Dubai Customs recorded **18.2 million** air cargo customs transactions in the first half of 2026, a **53% increase** on the same period in 2025.

1.3M t
Approx. air cargo volume in H1 2026, up nearly 47%

6.2M+
Postal parcels handled in the first half of the year

AED 1,000
Customs duty exemption threshold for eligible e-commerce shipments, from 3 August

53%
Growth in air cargo customs transactions year on year

The growth reflects Dubai's expanding role as a regional distribution centre for international e-commerce and express deliveries.
